

Hello! dear friends i hope you are all fine and grace is with you. I write to you so as to brief you on my progress at the prison, so far am pleased with how the project has picked and thanks to you for always supporting me and encouraging me to keep doing what makes my heart sing. The institution boss gave his full support towards my project and yesterday he listened to the songs and the poems the boys have composed and he gave us go ahead and was so impressed with the whole project. It's hard especially here in Kenya to get the support of the prison boss especially when it comes to media stuff! am glad that my project is well received by everyone.

The first song is called "Badilika" meaning change, in this song they tell their stories and how prison life has changed them, the lyrics are phenomenal and so touching. The second song is called second chance, in this song they sing about second chance in life, they wish and long for it. They also elaborate more on how they wish to have gained access to the inner resources before coming to prison. Besides these two wonderful songs they also have poems to support their message.

These boys have really inspired me and working with them is the best thing that has ever happened to me... I have dedicated my heart and soul into this project and I trust the universe will provide whatever will be required in this project. Currently, there is a music producer who has accepted to give me a hand in this project, my dream is to see these boys record these two songs, poems and do a video to enable this project complete. I have raised 15000ksh as per now and the total amount required in this project is 50000ksh. I trust that I will raise this money to enable these boys record before some of them leave in November.

My dear friends, please am requesting if in whichever way you can give a helping hand I will appreciate. Together let's work to see this dream come true, please pass this message to your friends because one never knows what grace has for us. Thanks for your support and love.. Hope to hear from you. Namaste.

N;B I have been given permission to post the photos and very soon you'll see them..
